# Vocabulary Instruction

## Choosing Words to Teach

### Tier III

Tier III words are low-frequency words and are limited to a specific "domain". They often pertain to a specific content area. These words are best learned within the context of the lesson or subject matter.

*Examples: atom, molecule, metamorphic, sedimentary, continent*

### Tier II

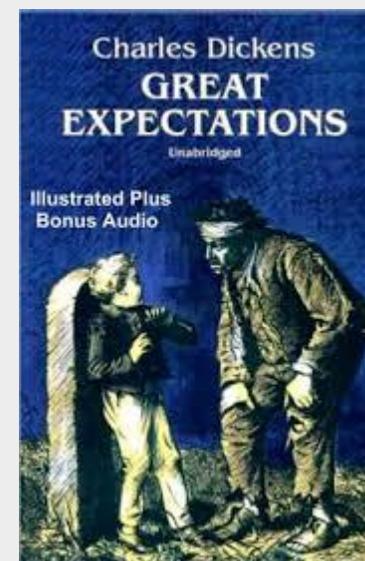

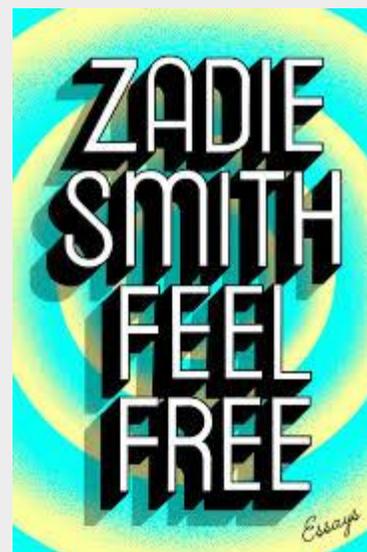

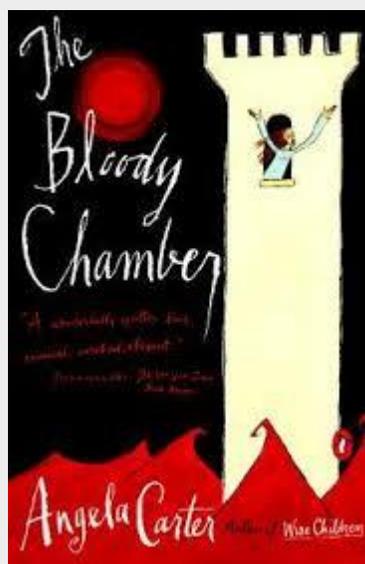

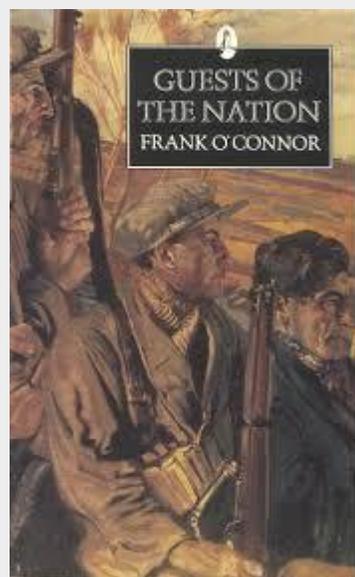

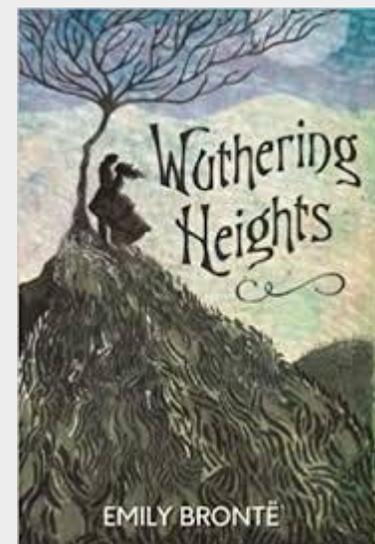

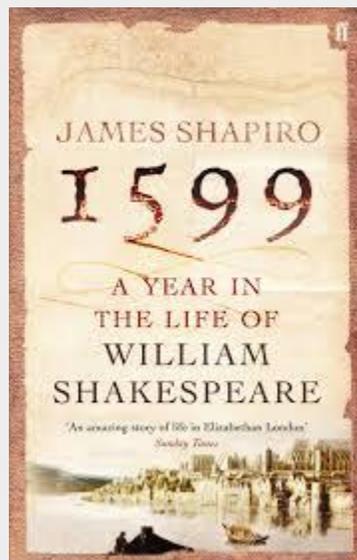

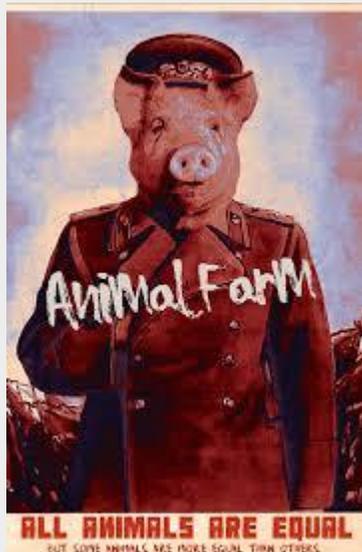

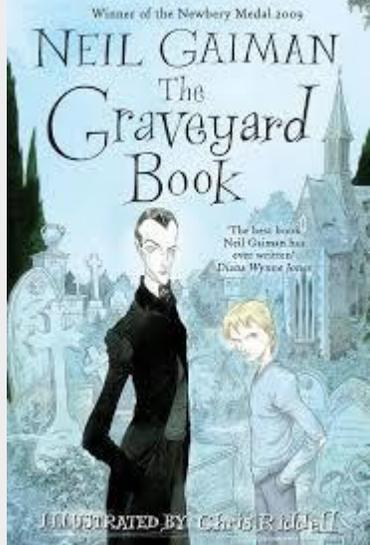

Tier II words are high-frequency words that occur across contexts. These words are used by mature language users and are more common in writing than in everyday speech. Tier II words are important for students to know to enhance comprehension of a selected text. Tier II words are the best words for targeted explicit vocabulary instruction.

*Examples: hilarious, endure, despise, arrange, compare, contrast*

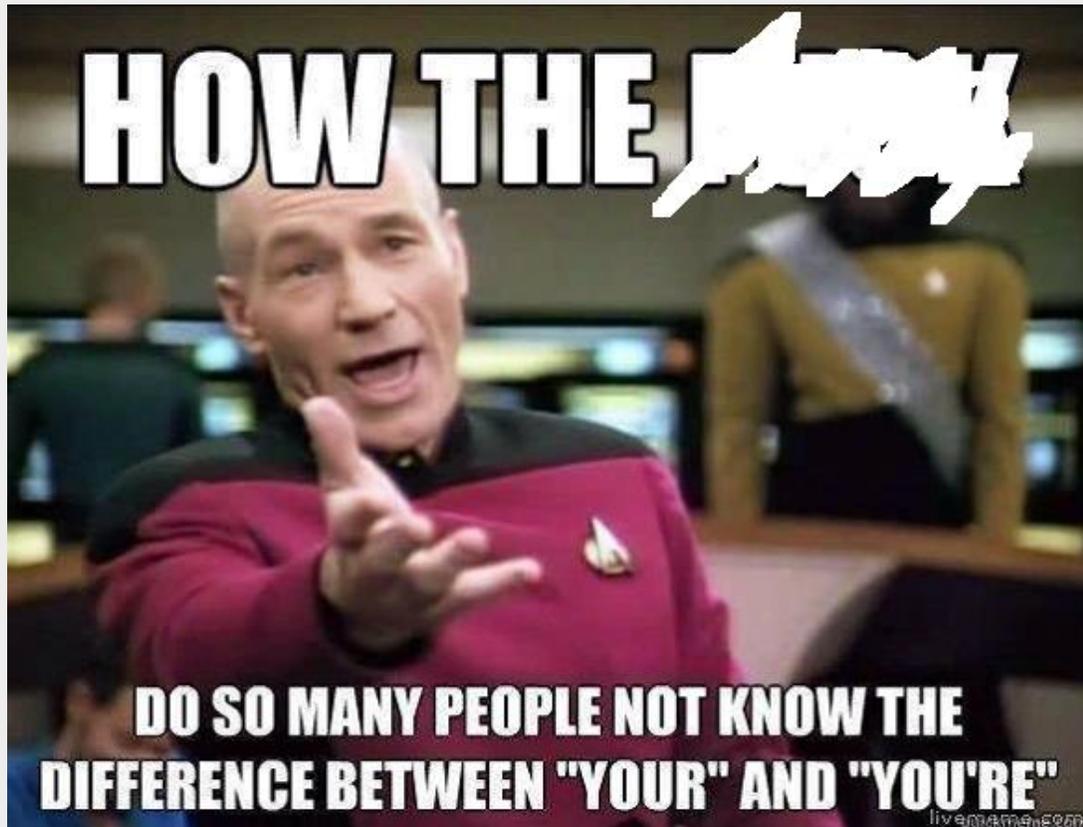

### Tier I

Tier I words are the words we use everyday in our speech. These words are typically learned through conversation. These are common words that rarely require direct instruction.

*Examples: come, see, happy, table*

# A final caveat....

“The future success of all our students rests predominantly on their ability to become proficient and fluent readers....We know that once students begin reading with some fluency that most words are learned from reading and not from being taught explicitly”

therefore

“the most reliable method to broaden and deepen the vocabulary of children in our schools is to get them reading a significant amount”

Quigley, Alex “Closing the Vocabulary Gap” Routledge, 2018
